ABOUT ME

Data Analyst with experience across financial services, consulting projects, and public-sector analytics. Strong in SQL, Python, BI tools, and AI-powered tooling to deliver segmentation, funnel diagnostics, and automated reporting. Generated +25% conversion uplift, reduced churn by 15%, and eliminated 90% of manual workflows across 300K+ users.

EXPERIENCE

- **Data Analyst — SayaKaya (Sucor Group), APERD Platform** Jakarta, Indonesia
Apr 2024 – Present
Business Intelligence & Customer Analytics
 - **Ad-hoc BigQuery requests created a reporting bottleneck**, independently built a full-stack analytics platform (Node.js, BigQuery ML, Claude API) with live dashboards, a natural-language query assistant, and churn/AUM forecasting, cutting time on routine reporting requests by an estimated 70%.
 - **Faced low onboarding conversion**, led funnel diagnostics by building Looker dashboards and experiment frameworks, resulting in a 25% conversion uplift.
 - **Observed rising churn**, owned cohort analysis on 10K+ Google Analytics users and proposed lifecycle actions, reducing attrition by 15%.
 - **Manual bonus reporting caused delays**, automated SQL pipelines and validation checks, cutting workload by 90% while maintaining 100% payout accuracy.
 - **Generic investor targeting limited engagement**, designed segmentation models and personalization rules, increasing campaign interaction by 20%.
- **Team Lead — RevoU, Edutech** Remote
Jun 2025 – Feb 2026
Mentorship & Project Delivery
 - **Learners struggled with applied analytics**, guided 15+ participants through SQL/Python case projects and reviews, improving project outcomes.
 - **Inconsistent progress visibility**, implemented milestone tracking and feedback cadences, accelerating cohort completion.
- **Data Analyst Associate (Intern) — RevoU, Edutech** Remote
Jan 2024 – May 2024
Marketing & Customer Analytics
 - **Low loyalty penetration in campaigns**, conducted profiling and behavioral clustering, expanding loyalist segments by 32%.
 - **Conversion targeting lacked precision**, built an 80%+ accuracy Python propensity model with RFM features, uncovering 25% more high-potential users.
 - **Unclear revenue mix**, analyzed Kaggle e-commerce datasets totaling \$139B GMV and visualized category contribution, surfacing 48% adult-content share.
- **Data Scientist Intern — Diskominfo East Java** Surabaya, Indonesia
Jun 2019 – Aug 2019
Public Sector Analytics
 - **Volatile commodity pricing challenged forecasting**, cleaned 10K+ public market records and developed a Tkinter-based Extreme Learning Machine tool, achieving 90%+ prediction accuracy.

EDUCATION

- **RevoU** Jakarta, Indonesia
Sep 2023 – Jan 2024
Full-Stack Data Analytics (Grade: 98.55/100)
 - Projects: Propensity Modeling, Customer Segmentation, Funnel Analysis, A/B Testing, Hypothesis Testing.
 - Tools: SQL, Python, Tableau, Power BI, BigQuery.
- **University of Brawijaya** Malang, Indonesia
Aug 2016 – Jul 2023
B.Sc. in Computer Science (GPA: 3.63/4.00)
 - Thesis: Chili Disease Identification using Learning Vector Quantization.
 - Activities: Led IT operations for Olimpiade Brawijaya, boosting engagement by 50% and maintaining 500+ devices.

SKILLS & CERTIFICATIONS

Core Skills: SQL, Python, Google BigQuery, Tableau, Power BI, Google Analytics, ETL, Node.js, LLM Integration (Claude API)

Analytics Methods: EDA, Cohort Analysis, Hypothesis Testing, A/B Testing, Propensity Modeling, BigQuery ML, Funnel Analysis, Segmentation, RFM, Dashboarding

Certifications: RevoU Full-Stack Data Analytics (2024); Machine Learning (2020); Data Visualization (2020); Python (2020)
